

Iteration 1: Completed February 5th

- Event Creation
 - Implemented event creation by registered users.
 - This includes time, date, location, description, and name of the event
 - Created functionality to allow event creators to input lists of emails representing people invited to the event.
- Accessibility
 - Implemented invite email functionality. Email invites can be used to respond to event invite.
 - Link in email takes the user to the event page.
 - Attending invitees are displayed in an 'invitee list' on the event page.
- Invitee Polls
 - Implemented poll creation. Allows event creators to create polls (specifically for dates) on their events
 - Invitees are able to vote on various poll options that poll creator sets.

Iteration 1: Missed Targets

-Missed implementing the ability for poll creators to select poll options and have them automatically set as event details. This functionality will carry forward into iteration 2.

Iteration 2:

- Event Communication
- Edit Responses
- Public Events
- Poll item selection by creator (carry forward from iteration 1)

Iteration 3:

- Invitee Details
- Events by Location
- Event Notifications

Iteration 4:

- Invite Friends to Event
- Ticket Payments
- Attendance Restrictions
- Ticket Sales
